Roblox Game: <https://www.roblox.com/games/15872323663/pk-kill-go>

About Me

I am a dedicated Network and Security Specialist with extensive experience in network protocols, penetration testing, and full-stack development. My passion for cybersecurity drives me to continuously expand my expertise and stay ahead of emerging technologies. I have successfully completed a diverse range of projects that highlight my technical proficiency, analytical problem-solving, and innovative thinking. Thriving in dynamic environments, I am always eager to embrace new challenges and opportunities that push the limits of my knowledge and skill set.

Education

Universiti Teknologi Malaysia (UTM) - Graduated with a major in Network and Security

Professional Experience

Freelancer - Full Stack Developer

Network and Security Specialist - 2 years of professional experience in network and security management

ChatGPT Integration - 2+ years of experience in integrating and working with ChatGPT.

Node.js Development - 1.5 years of experience in developing applications with Node.js

C++/Python Projects - Worked on various projects like IoT app and many more

Flutter for mobile - Worked as a Flutter developer for various projects including MMHE

Project Management - Managed teams and projects

Loopback 4 - Developed APIs for the system using Loopback4 API RestAPI

TypeScript - Managed programs using TypeScript for the backend using APIs Loopback

Wireshark - Participated in Blue Team where I had to analyze the traffic

Bug bounty - Participated in bug bounty programs such as Indrive Meta and NBA public program

Technical Skills

- Network Protocols
- Linux (Kali Linux)
- WiFi Cracking (Wifite, Aircrack-ng, Bettercap)
- Spoofing
- Bug Scanning
- Penetration Testing
- Burp Suite
- Metasploit
- Full Stack Development (HTML, CSS, JS, Node.js)
- ChatGPT Experience
- Node.js Development
- Flutter for Mobile Development
- Python for Custom Tools

Additional Skills

- Project Management: Experienced in managing and coordinating multiple projects simultaneously to ensure timely delivery and adherence to budget.
- Problem-Solving: Strong analytical and troubleshooting skills to identify and resolve network and security issues efficiently.
- Communication: Excellent verbal and written communication skills, enabling clear and effective interaction with team members and clients.
- Collaboration: Adept at working in diverse teams and fostering a collaborative environment to achieve common goals.
- Adaptability: Quick to adapt to new technologies and industry trends, ensuring up-to-date knowledge and skills.
- Attention to Detail: High level of precision and accuracy in tasks, particularly in network configurations and security protocols.
- Time Management: Proven ability to prioritize tasks and manage time effectively to meet deadlines.
- Continuous Learning: Committed to ongoing education and professional development,

including attending workshops,
webinars, and industry conferences.

- Customer Service: Skilled in providing exceptional customer support and maintaining positive client relationships.
- Multitasking: Capable of handling multiple tasks efficiently in high-pressure environments.
- Innovation: Always looking for innovative solutions and improvements to enhance system performance and security.
- Technical Documentation: Proficient in creating detailed technical documentation for various network and security processes.

Achievements & Certifications

- Computational Thinking Through Robokar Workshop (26th January 2021)
- Sangfor Cyber Guardian Firewall - Your Managed SOC Solution (13 - 15 December 2022)
- Cisco Network Security (4th August 2023)
- Cisco IoT Fundamentals: Connecting Things (2nd August 2023)
- Cisco Internetworking Technology (10th April 2022)
- Cisco CCNAV7 Switching Routing and Wireless Essentials (13th November 2021)

Projects

I have worked on over 20 projects, which are available on my GitHub:

<https://github.com/SaifKroka?tab=repositories>.

These projects include various full-stack applications, network security tools, and automation scripts. Additionally,

I have developed a personal website to showcase my work:

<https://saifwebsolutions.github.io/SaifWebSolutions/>.

One of my notable projects is a Roblox game, which you can check out here:

<https://www.roblox.com/games/15872323663/pk-kill-go>.
